DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: In line 7 of claim 1, "form" should be --from--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, in the antepenultimate line through the penultimate line of claim 2, "a predetermined conductive adhesive member having anisotropic conductivity" is indefinite because it is unclear as to whether "a predetermined conductive adhesive member" set forth in claim 1 is referenced or an entirely different member.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Scheidecker et al (US 5,734,523). As per claim 1, Scheidecker et al shows in figure 1 a magnetic head assembly 10 including a magnetic head 14; a rotational arm 11 mounting the magnetic head 14 and an arm side-wiring member. One end of the arm side wiring

member is electrically connected to the magnetic head 14 and the other end has a first connecting portion, provided on the rotational arm 11. Figures 8 and 9 show an external side-wiring member, one end able to electrically connect to an external circuit provided separately form the rotational arm 11 and the other end has a second connecting portion.

Figures 8 and 9 also show the first connecting portion of the arm side-wiring member and the second connecting portion of the external side-wiring member are overlapped with a predetermined conductive adhesive member in between and electrically connected to each other on the rotational arm 11. In column 6, lines 15-39 Scheidecker et al discloses that the conductive adhesive member 65 having anisotropic conductivity in a direction of overlapping of the first and second connecting portions.

As per claim 2, Scheidecker et al shows in figure 13 the arm side-wiring member including a wiring pattern made of a conductive material formed on the rotational arm 11 and a relay board electrically connecting the wiring pattern and the external side-wiring member. The relay board and the wiring pattern are overlapped with the predetermined conductive adhesive member 65 having anisotropic conductivity in between and electrically connected to each other.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David D. Davis whose telephone number is 571-272-7572. The examiner can normally be reached on Monday thru Friday between 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa T. Nguyen can be reached on 571-272-7579. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
